

SERVICE SHEET

ENVIRONMENT

ENVIRONMENTAL ENGINEERING

Fyfe provide planning and technical expertise for design, approval and construction of infrastructure which minimises environmental risks and contributes to sustainable outcomes, while meeting or exceeding project objectives.

ENVIRONMENT

ENVIRONMENTAL ENGINEERING

Our people have extensive experience working with developers, energy and resources clients, government infrastructure agencies and local government. We can assist with stakeholder liaison, community consultation and provide the specialist technical advice to assist and inform decision making early in the approval process, leading to delivery of innovative, cost effective projects.
